

YOUR EQUIPMENT

(what's included)

Parts x 31 • Life pod x 1 • Astronaut x 1

Achievement card x 1

EUROPA

TYPE:
MOON

SATELLITE OF:
JUPITER

DIAMETER:
3,100 KM

ATMOSPHERE:
MOSTLY OXYGEN

TEMPERATURE:
-160 °C

CHANCE OF LIFE:
POSSIBLE

ASTROPOD™ is an international corporation striving to explore our solar system. This time, they have landed on a moon of Jupiter called EUROPA.

EUROPA was discovered by Galileo in 1610, researched by mankind in 2024, now explored by you.

MISSION: STATION BUILDER

ASTROPOD™ life-supporting **POD** can provide communication system, scientific equipment, and entertainments to our crew. Your mission is to design and build a space station here on EUROPA. Remember, **if the POD connects, it works!**

OBJECTIVE:

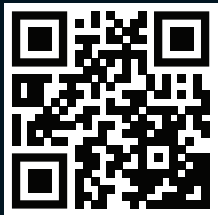

- 1) Design and Build a space station.
- 2) Extend the research station by using 2 more pods or rocket parts (extra pods and rocket sold separately)

● Concept art of water vapor ejected off the surface of Europa

DID YOU KNOW?

Jupiter exerts a large gravitational pull to EUROPA, which is **1,000 times** stronger than our tidal force on Earth. This gravitational pull could cause **water vapour erupting** 20km high into the atmosphere!
